

REX LIU

# **EDUCATION**

## University of California, Berkeley | BA, Computer Science Major

Aug 2020 - May 2020 (EXPECTED)

### PROFESSIONAL EXPERIENCE

## HKP Solutions | Software Developer Tech Lead

Iun 2020 – Present

- Lead team of 10+ developers to develop hotel management Android mobile and React web application
- Developed 80+ screens (40+ for each), managed integration of 170+ pull requests, and handled 70+ issues/improvements
- Run effective scrum meetings to efficiently update backlog items, create quality products, and achieve company goals
- Work with CEO and CTO to define project scope, objectives and development roadmap

## **Investocracy** | Full Stack Web Developer Intern

Iun 2020 - Present

- 1 of 3 developers developing 4 websites at Tokyo-based startup connecting investors and startups across Asia and Africa
- Developed dynamic and responsive React frontend with 75+ reusable components and 15+ pages
- Implemented secure user authentication with Redux, MongoDB, and Firebase Authentication
- Designed and built script to generate and deploy 10K+ SEO-friendly startup webpages
- Improved SEO by implementing sitemaps, allowing Google to effectively crawl sites

## RISE | Software Engineering Manager

Jun 2020 – Sept 2020

- Led team of 5 developers in creating job tracking and finding platform and community
- Created dynamic React frontend and implemented secure Firebase Authentication and MySQL Database
- Allocated work, provided guidance, and resolved issues to meet performance objectives

### **PROJECTS**

## Philadelphia Church of Vancouver Mobile Application

Spring 2019

Tools: Java, XML, Google Firebase, Android Studio

- Increased community engagement of local church by developing Android mobile app as a connection platform
- Implemented secure Firebase database storage for announcements, videos, images, and notifications
- Published application on Google Play Store with 30+ downloads

**Stock Trading Bot** Summer 2020

Tools: Python, Google Cloud, Sklearn, NumPy, Alpaca Trading API

- Implemented Alpaca Trading API to import data and create buy/sell orders while deployed on Google Cloud
- Designed Al software to predict the stock movement based on trends; creates buy/sell orders accordingly

### EXTRACURRICULARS

## Berkeley Engineering Student Council | External Vice-President Officer

Jun 2020 - Present

- Facilitate connection and inclusion within faculty by hosting events, funding clubs, and creating initiatives
- Find sponsors and form corporate connections with University-affiliated organizations and externally

# Semiahmoo Programming Club | Co-Founder and President

Nov 2018 - Mar 2020

- Mentored 15 high school students Java and Python with interactive challenges and projects
- Directed team of 5 executives and coordinated meetings and events with sponsor staff and principal

## SKILLS

# **Technical Skills**

Languages: Python3 • JavaScript • Java

**Tools:** React • Node • Firebase • MongoDB • Redux •

Express • GitHub (LFS) • MySQL

Knowledgeable in: Android Development • Web

Development • Data Science • Algorithms Design & Analysis • Data Structures

# Soft Skills

Leader • Collaborator • Innovator

#### ACHIEVEMENTS

# **UBC Physics Olympics Champions** | Mar 2019

1<sup>st</sup> / 600 Students – Provincial Physics Competition

### Award of Excellence in Programming 11, Pre-Calculus 11 | Jun 2018

1st / 60 Students per Class – 96%+ Final

## **FUN FACTS**

#### Hobbies

Badminton • Piano • Photography • Rubik's Cube

### Interests

Automation • Aerospace Engineering • Cryptocurrency
